In The Name Of God

And Allah revealed to the bee that it feeds on mountains, trees and high ceilings, then it feeds on all kinds of sweet fruits (and on the sweetness and nectar of fragrant flowers). And obey the Lord's instructions. For me, sweet wine of various colors is healing and therapeutic.

Greetings and respect, Asal Farvardin Lek

The specialized catalog of Farvardin Amak Group products, which includes bee products, traditional spirits, and high-quality foods in 3 different categories. In this catalog, we present all the products with full descriptions. It is expected that we will not be able to develop a better and more complete understanding of the results in this way.

PERSIAN SIDR HONFY

عمل السرر الابراني

SIDR HONEY BOTANY

Sidr plant with white flowers has 4 species in Iran and more than 100 species in the world. They have small leaves and evergreens. Most bee activity is reported in the form of nectar, and pollen collection is rarely and hardly done by common bees. Almost in most months of the year, especially from spring to autumn, side flowering takes place, but the effective period in beekeeping is from mid-September to early November and to a limited extent in April and May.

PROPERTIES OF SIDR HONEY

Properties of sidr honey: Strengthening sexual powers, strengthening hair and preventing hair loss, with hydrolyzed protein, very tonic and energy.
